

Hafiz Putra Ludyanto

Senior Backend Engineer

Surabaya, Indonesia hafizputraludyanto@gmail.com +62 813 3190 0797 [linkedin.com/in/hafiz-putra-ludyanto](https://www.linkedin.com/in/hafiz-putra-ludyanto) github.com/fairyhunter13

PROFESSIONAL SUMMARY

Senior Backend Engineer with 7+ years in Go/Golang. Reduced medical verification attempt rates by 23% at Kitabisa, maintained notification infrastructure for 11M users at Flip, and owned compliance verification delivery at FrankieOne. Currently at Astro (21+ microservices). 2,900+ GitHub contributions/year. AI-assisted development with Claude Code, Codex, Hermes, OpenCode, and Windsurf.

TECHNICAL SKILLS

Languages & Frameworks: Go (Golang), Python, TypeScript, React, Vue.js, gRPC, REST API

Infrastructure: AWS, Kubernetes, Terraform, Docker, GitHub Actions, GitLab CI/CD

Data & Messaging: PostgreSQL, Redis, Kafka, RabbitMQ, MongoDB, Qdrant, LanceDB

AI & Tooling: Claude Code, OpenAI Codex, Hermes, OpenCode, Windsurf, LLM Integration, ONNX Runtime

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Part-time)

Jan 2026 – Present

Astro — Quick Commerce, Rapid Grocery Delivery Platform (Indonesia, Remote)

- Contributing to a polyglot microservices platform (21+ services) using Go and Java (Spring Boot), with gRPC/Protobuf for type-safe inter-service communication across 49 API domains
- Developing backend services following Clean Architecture and Domain-Driven Design patterns with database-per-service isolation across PostgreSQL, Redis, MongoDB, and ClickHouse
- Building analytics and data pipeline features for high-throughput query processing and operational forecasting
- Maintaining shared Go libraries and contributing to platform infrastructure including API gateway configuration and observability tooling, using AI-assisted development with OpenCode, Claude Code, Codex, and Hermes

Technologies: Go, Java (Spring Boot), gRPC, Protocol Buffers, PostgreSQL, Redis, MongoDB, ClickHouse, Google Pub/Sub, Kong, Docker, GKE, GCP, Datadog

Senior Software Engineer

Sep 2023 – Dec 2025

FrankieOne — RegTech, Identity Verification & Compliance Platform (Australia, Remote)

- Owned end-to-end backend delivery across 5+ repositories in a distributed remote team, shipping features from RFC to production with structured post-release monitoring
- Reduced incident resolution time by improving audit trail visibility, structured logging, and targeted diagnostics across compliance verification workflows
- Strengthened platform reliability by building end-to-end and integration test suites, reducing regressions across identity verification pipelines
- Accelerated development velocity using AI-assisted workflows (Windsurf), building CLI utilities and automation scripts that eliminated repetitive operational steps

Technologies: Go, React.js, Vue.js, TypeScript, Node.js, AWS, Terraform, PostgreSQL, Redis, Docker, GitHub Actions

Senior Software Engineer

Nov 2022 – Sep 2023

Mekari — Financial Technology, Lending & Payment Solutions (Indonesia, Remote)

- Managed 6+ frontend and backend services across merchant lending and payment operations, serving financial transaction processing across lending platforms
- Initiated RFC for purchase invoice financing and contributed to multiple technical RFC documents, standardizing protocols across lending services
- Improved performance of multiple backend services and designed architecture for current infrastructure

Technologies: Go, Kubernetes, PostgreSQL, Redis, Datadog, Sentry, Docker, Vue.js, TypeScript

Senior Software Engineer

Jan 2022 – Oct 2022

Flip — Digital Payments & Remittance Platform (Indonesia, Remote)

- Maintained notification services and integrated monolithic legacy service with notification architecture, serving a platform of 11 million users
- Managed technical dependencies with 3+ third-party service providers for notification delivery infrastructure
- Authored backend technical design documents for notification inbox service, defining API specifications and system architecture

Technologies: Go, PHP, Kubernetes, GCP, GKE, PostgreSQL, MySQL, Redis, Google Pub/Sub, Docker, Datadog, GitLab CI/CD

Senior Software Engineer

Mar 2021 – Jan 2022

Lemonilo — E-commerce & Healthy Food Platform (Indonesia, Remote)

- Developed pre-order limitation feature with sales quota management handling 4,000+ products
- Developed technical assessment and roadmap for reengineering, including evaluation of new payment method integrations
- Led the purchasing engineering team and researched current business flows and upcoming features to inform technical strategy

Technologies: Go, Kubernetes, GCP, GKE, PostgreSQL, MongoDB, Redis, Google Pub/Sub, Docker, Grafana, Azure Pipelines

Software Engineer

Apr 2019 – Mar 2021

Kitabisa.com — Social Impact & Crowdfunding Platform (Jakarta, Hybrid)

- Reduced medical verification attempt rates by 23% through systematic backend optimization and validation logic improvements
- Decreased multiple rejected medical verification requests by 31% via enhanced validation logic and backend error handling
- Built multi-channel notification service supporting SMS, WhatsApp, FCM, and email, processing thousands of daily notifications

Technologies: Go, PHP, Kubernetes, PostgreSQL, MySQL, Redis, Kafka, RabbitMQ, CircleCI, New Relic, Grafana, Docker

Software Engineer

Sep 2018 – Apr 2019

Tokopedia — E-commerce Marketplace Platform (Jakarta, Onsite)

- Improved code quality by 40% through comprehensive unit testing across power merchant services, establishing testing standards for Indonesia's largest e-commerce platform
- Maintained campaign services (flash sale and slash price) and power merchant service operations at scale

Technologies: Go, PostgreSQL, Redis, NSQ, Docker, Datadog, Grafana, Consul

EDUCATION

Bachelor of Information Systems — Institut Teknologi Sepuluh Nopember (ITS)

2014 – 2018

SPEAKING

GoJakarta Developer Meetup (Dec 2020) — Presented "Reflethelper: Simplifying Go Reflection"
